### FAA Compliance for ResMed Devices

To whom it may concern,

The ResMed respiratory assistive devices are medical devices cleared for sale by the Food and Drug Administration, a branch of the Federal Government of the United States of America, and has been prescribed for use on or by the order of a physician.

The US Department of Transportation (DOT) Final Rule, “*Nondiscrimination on the Basis of Disability in Air Travel*” (73 FR 27614 which updates Title 14 CFR Part 382), effective May 13, 2009 provides important new requirements for the accommodation of passengers with respiratory assistive devices (Ventilators, Respirators and CPAP machines).

In line with these requirements, respiratory assistive devices may be used on-board an aircraft, without further testing by the carrier, provided they have been tested for Electromagnetic Compatibility (EMC) in accordance with the current version of RTCA/DO-160, Section 21, Category M.

ResMed has now successfully completed testing for the following respiratory assistive devices. **The devices listed below comply with RTCA/DO-160G, Section 21, Category M, and are considered FAA compliant.** *This information may be engraved on the device or a sticker label is applied to the device. Either method for identifying FAA compliance is acceptable and in accordance with DOT regulation.*

Product Code	Product Description
33030	S8 Compact
33001, 33007, 33013, 33036, 33060	S8 Escape
33032	S8 Lightweight
